Findings: Does not have cloropleth map capabilities for heat map	Findings: Has cloropleth map & great details but more complex and requires info to be imported into the site.	Findings: Has heat map & cloropleth, very simple designs. Customizable.	Findings: Not much info, looks like it might need to be paid for to use.	Findings: Has customizable componenets, is able to make heatmap not quite sure yet, saw comments on github that's its possible.	Findings: Says for commercial, have to purchase. Used for nodes no heatmaps.	Findings: Ideal for use on heatmaps and any other graph or chart.
